Creating a life that works in the flexible job age

Professor Ellen Kossek is a University Distinguished Professor at Michigan State University's Graduate School of Labor & Industrial Relations. Her presentation will focus on 'flexstyles' - the different ways that people psychologically manage work-life boundaries in the age of 24/7 work, IT enabled accessibility, and family obligations. Are you an integrator, separator, or volleyer? How can you create more positive work-life relationships?

Helping businesses manage the "Right to Request" flexibility

Juliet Bourke, Partner at Aequus Partners, will discuss new research findings and practical ideas for organisations to bridge the gap between flexibility policy and practice. Does training really help to build managerial capability to implement a flexibility agenda? What does the "Right to Request" flexibility mean for employers? What are market leaders doing?
